

Canadian Pharmacists' Association (CPhA)'s CPS Online

Product Overview

Joule™, a Canadian Medical Association (CMA) company, is pleased to offer all CMA members access to Canada's trusted source for drug information — the Canadian Pharmacists Association's (CPhA) online *Compendium of Pharmaceuticals and Specialties (CPS)*, the Canadian standard for drug monographs.

CPS online is a web-based resource with quick and easy access to Canadian-specific content on more than 2,000 product monographs for drugs, vaccines and natural health products.

Health Canada advisories are linked directly to the drug monographs and are posted online within 48 hours of issue.

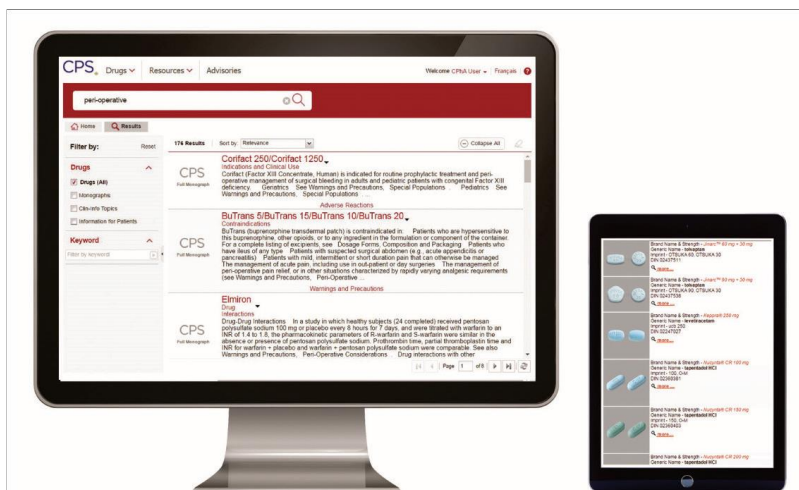

This definitive resource also includes hundreds of CPhA monographs that are written based on the best available evidence, reviewed by expert physicians and pharmacists and include valuable guidance on off-label uses. Exclusive to CPS online are the printable information for the patient handouts written in plain language and the interactive Clin-Info tools with clinical monitoring tools, customizable tables and the Product Identification tool.

CPS online is updated weekly and is available in English and French. CMA members can now access this exclusive benefit at no charge — a value of over \$500 annually. Visit www.cma.ca/cps Note: Users must be CMA members as well as registered cma.ca users to access CPS online.

Questions? Contact our Member Service Centre at memberservicecentre@cma.ca or 1-844-748-8017.
