

CPhA's RxTx Mobile App

Product Overview

Joule™, a Canadian Medical Association (CMA) company, is pleased to offer CMA members access to a valuable electronic point-of-care tool — the Canadian Pharmacists Association's (CPhA) *Compendium of Pharmaceuticals and Specialties* (CPS) on the RxTx Mobile app. As a bonus, you will also have access to Drug Choices (DC).

Updated weekly, the CPS on the RxTx Mobile app offers quick access to thousands of searchable product monographs. DC, drawn from CPhA's *Compendium of Therapeutic Choices* (CTC), works seamlessly with the CPS providing succinct, evidence-based prescribing information and relative costs for recommended therapies based on Canadian and international guidelines, covering over 2200 drugs for more than 200 primary care conditions.

RxTx Mobile, available in English and French, is accessible on iOS and Android devices — online or off. CMA members can now access this exclusive benefit at no charge — a combined value of over \$500 annually. Visit <https://joule.cma.ca/en/evidence/cps-online-and-rxtx-mobile-app.html> to download RxTx Mobile. Note: You will require an authorized cma.ca user account to download the app.

Questions? Contact our Member Service Centre at memberservicecentre@cma.ca or 1-844-748-8017.

Features

CPS

- Thousands of product monographs developed by manufacturers, approved by Health Canada and optimized by CPhA editors; includes drugs, vaccines and natural health products
- Search by name, therapeutic class, DIN/NPN or manufacturer
- Add and save notes specific to each product monograph
- Keep commonly viewed product monographs with notes in a favourites list for quick and easy access
- Toggle between English and French product monographs
- Health Canada advisories, warnings and recalls linked directly from monographs
- Interactive calculators including: Body Surface Area, Creatinine Clearance, Ideal Body Weight, Pneumonia Severity Index (PSI) and Volume to Inject
- Product images
- Directory of manufacturers
- Medical and microorganism abbreviation glossary
- Direct link to the publisher for feedback

DRUG CHOICES (DC)

- Evidence-based prescribing information for over 2200 drugs from 200+ primary care conditions including dose, adverse effects, drug interactions and relative cost
- Based on Canadian and international guidelines

- Search by condition
- Search by drug or drug class
- Add and save notes specific to each condition
- Keep commonly viewed conditions with notes in a favourites list for quick and easy access

Benefits

RxTx Mobile App

- Included with CMA membership
- Fully searchable Canadian drug and therapeutic information
- CPS and DC are fully integrated resulting in seamless search functionality
- Concise, point-of-care drug information with supporting interactive tools
- Current, accurate, updated weekly
- Health Canada advisories, warnings and recalls are linked directly to product monographs and are available within 48 hours of being issued
- Available in English and French
- Works online and off — internet connection is required only when installing, updating or using certain internet-dependent features such as Health Canada Advisories and product images

How do I access the RxTx Mobile app?

CMA members can register by clicking the Register and Download button on the CPS online and RxTx Mobile app product page. Members must be logged in to cma.ca to access the member-only CPS registration form. Need help with registering or accessing cma.ca? Contact the CMA Member Service Centre at memberservicecentre@cma.ca or 1-844-748-8017.
